Registration: If you are a new user, click the "**Register**" button on the login interface. Enter your phone number, email, or other required details, set a password, and follow the on-screen instructions to complete the registration process. You may need to verify your identity using an OTP (One-Time Password) sent to your phone or email.

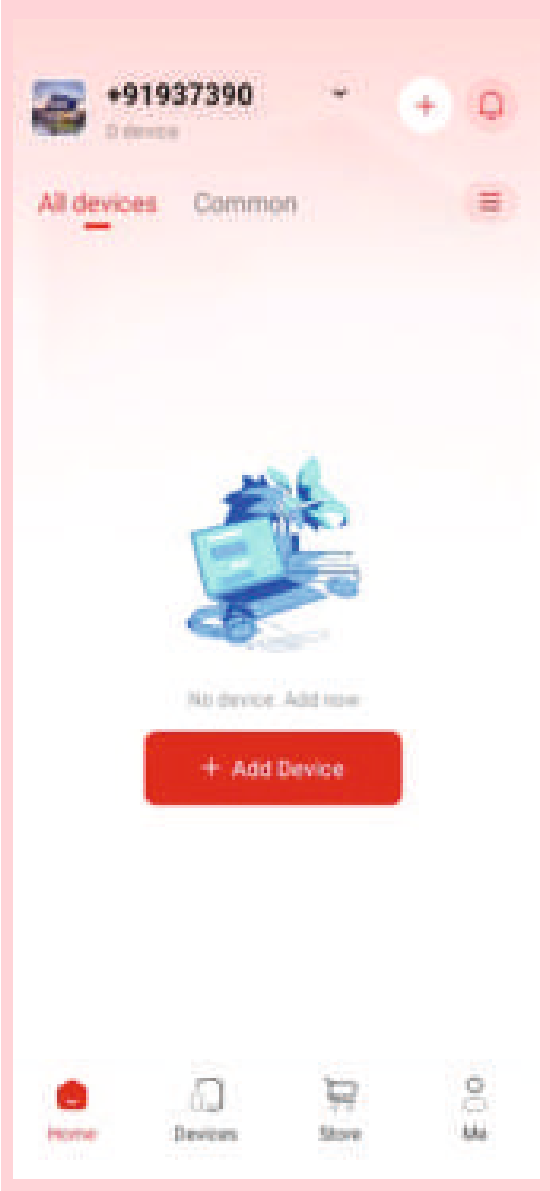

3.2) Login:

On the login interface, enter your account, phone number, or email along with the corresponding password, then click the "**Login**" button to log in.

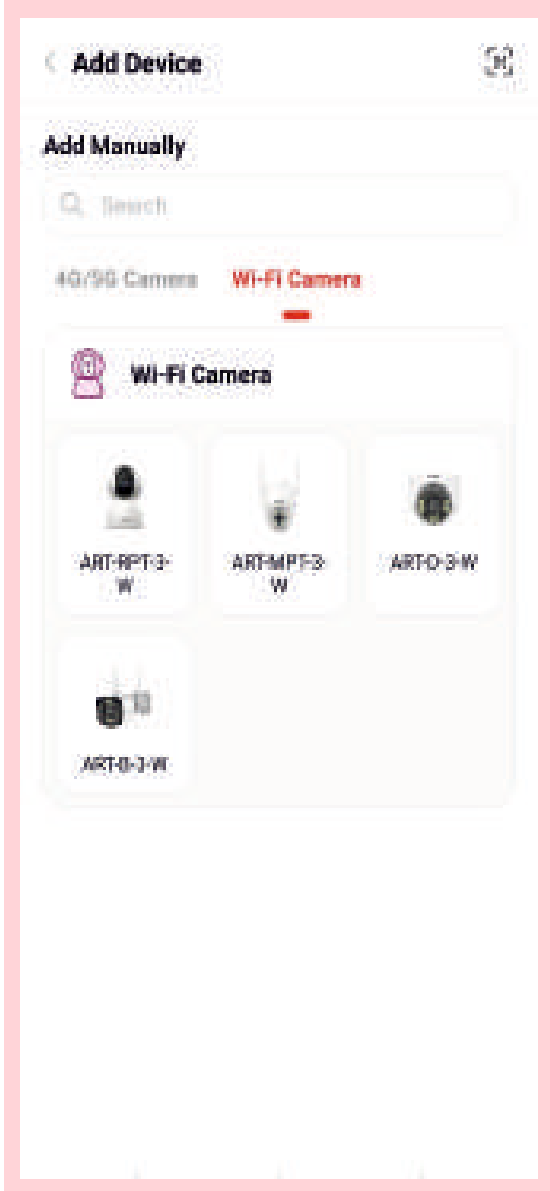

4) Adding a Device in the App

Open the app and click the **“+ Add Device”** icon

Adding the camera to the App

Select **Wi-Fi Camera** from the type of camera and tap on the appropriate icon to select the model of the camera.

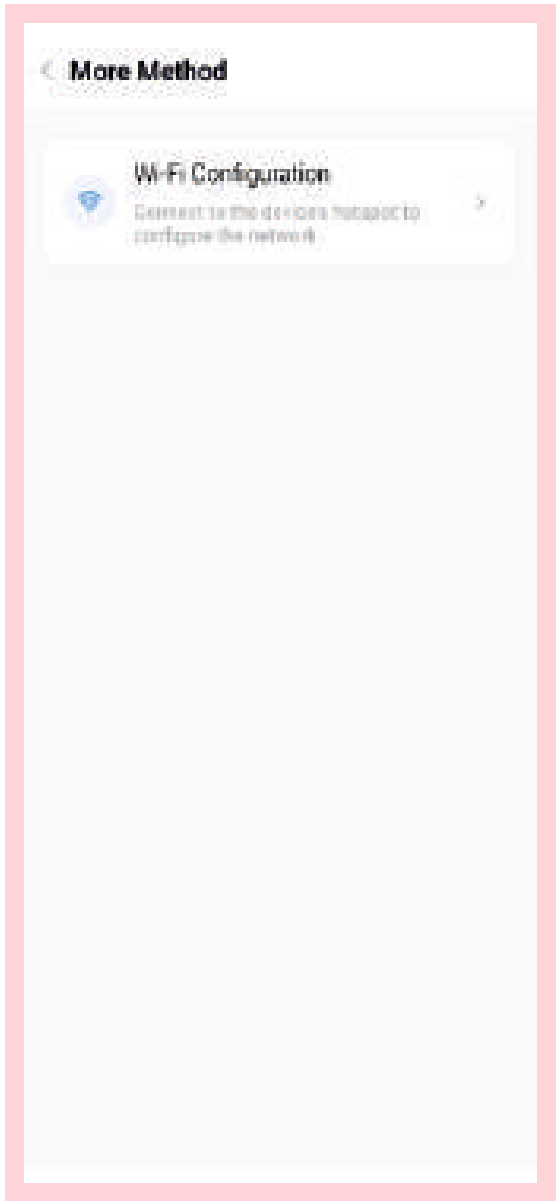

4.1) Device Power-On Confirmation

Click the **More Method** option located in the upper-right corner of the screen

More Method

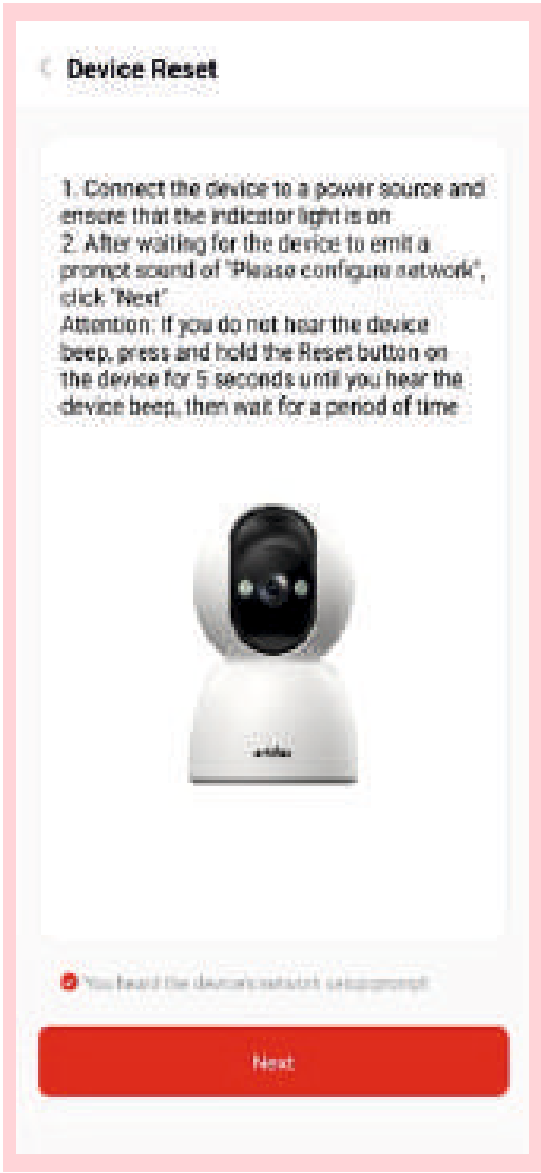

After selecting **"More Method"**, tap on **"Wi-Fi Configuration"** to proceed.

4.2) Device Power-On Confirmation

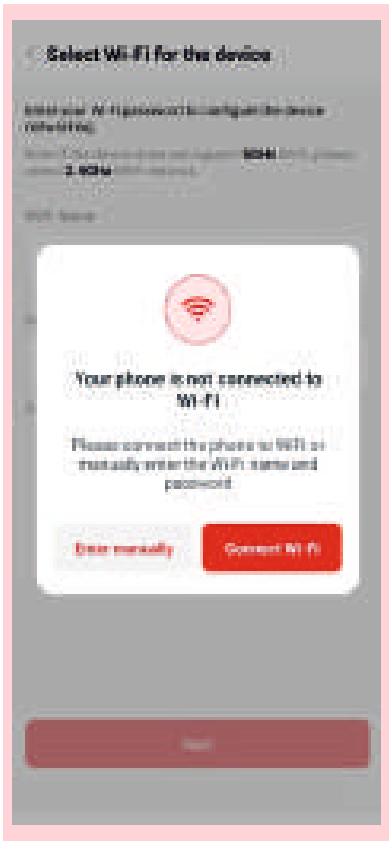

On the Add Device screen, you will see on-screen instructions. If your camera is already powered on, select the checkbox that confirms the device is powered on, then click **"Next"** to proceed with the setup.

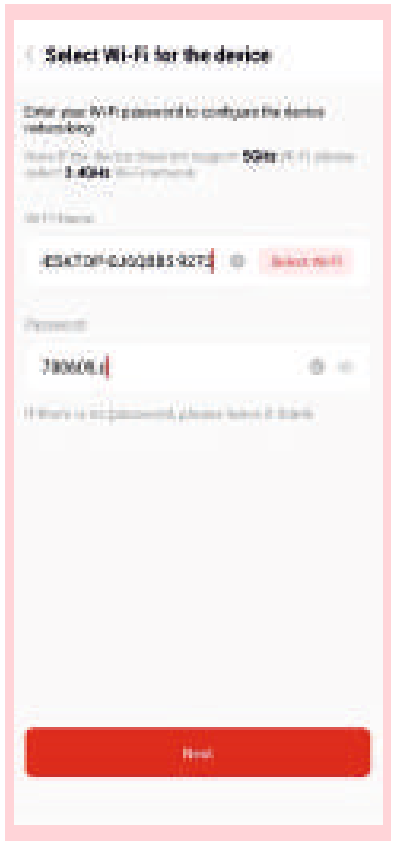

Note: You heard the device network setup prompt. Click on the check box to proceed to the next step.

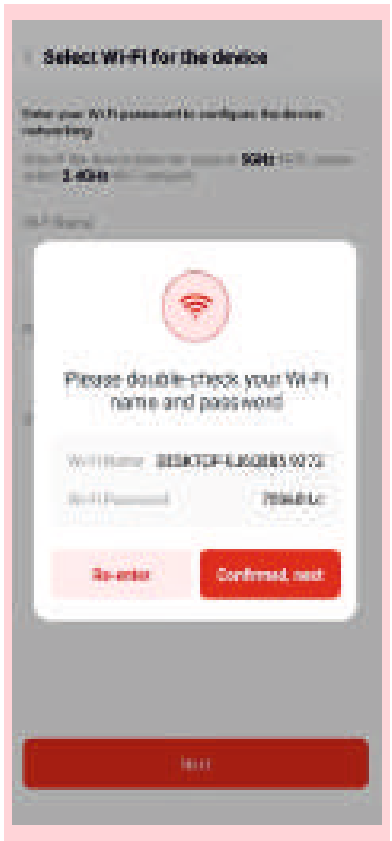

4.3) Connect to Your Wi-Fi

- The screen will prompt you to connect to Wi-Fi manually.
- Tap **“Connect Your Wi-Fi”.**
- Select your Wi-Fi network (SSID).
- Enter your Wi-Fi password, then tap **“Next”** to continue.
- After tapping **“Next”,** confirm your Wi-Fi and password, then tap **“Confirm, Next”** to proceed.

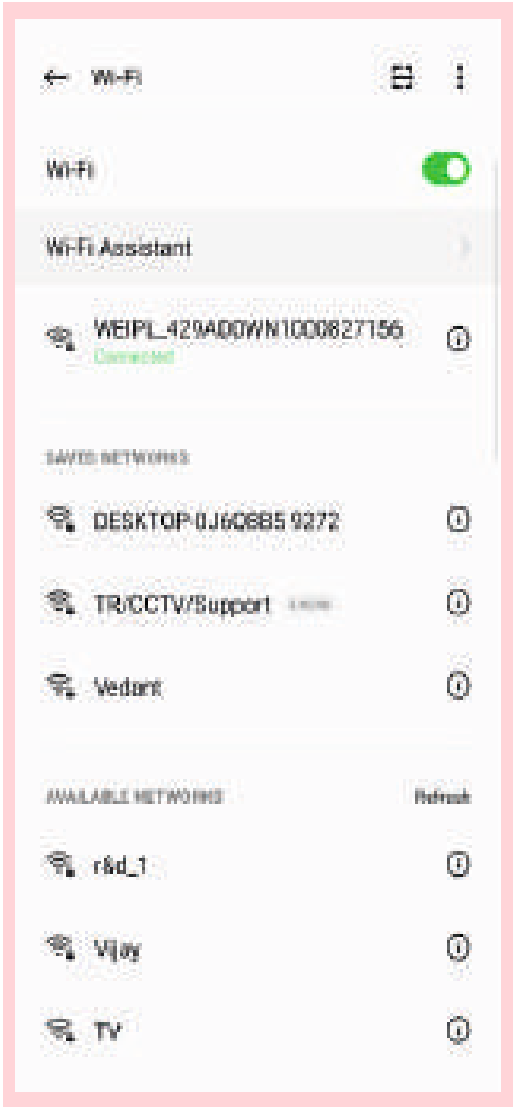

4.4) Connect to Device Wi-Fi

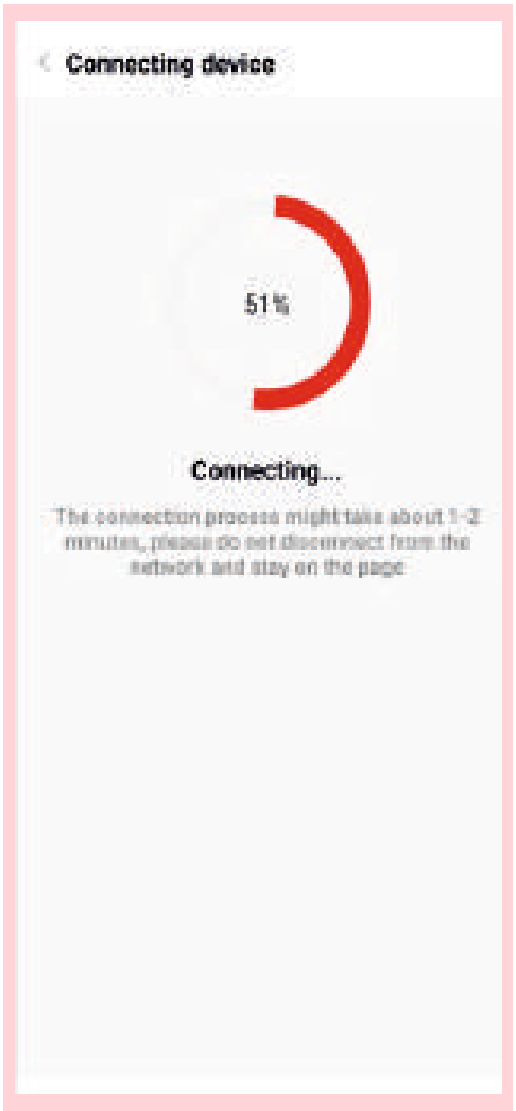

- Tap **“Go to Settings”** in the app.
- On your mobile device, open the **Wi-Fi Settings**.
- Look for the device’s Wi-Fi name **(e.g., WEIPLXXXXXXXXX)** and select it.
- Enter the default password: **WEIPL1234** to connect.
- Once connected, **go back** to the app to continue the setup

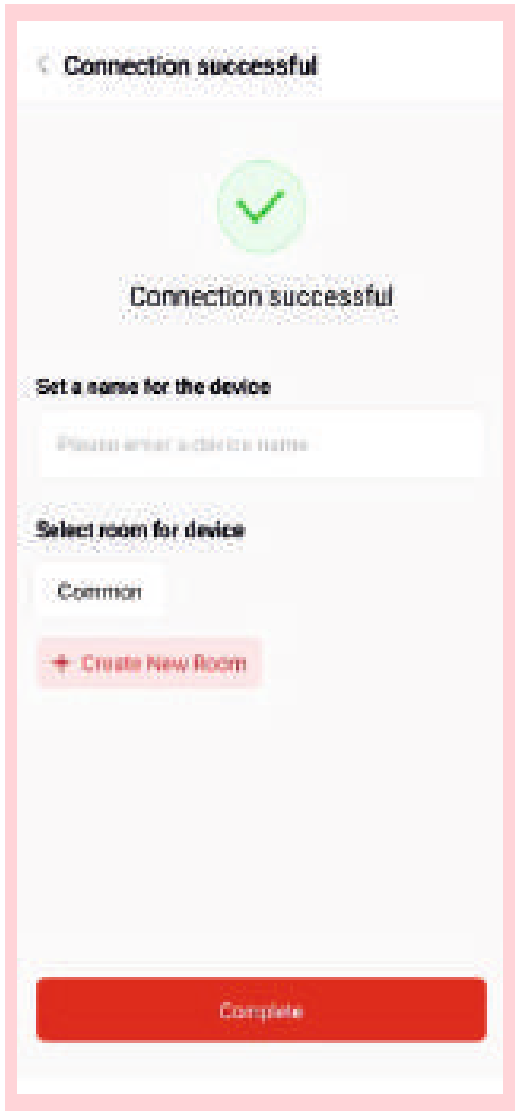

4.5) The configuration process should take less than two minutes to complete.

Please wait patiently and do not press the **Back Button** during this time. Interrupting the process may prevent the camera from connecting to your **Wi-Fi** or network properly

Name Your Device

Set a custom name for your device (e.g., “Front Door Camera” or “Garage Cam”) to help you identify it easily.
After entering the name, click “**Complete**” to successfully add the device.
